

NAMAN BACHHAWAT

✉ namanbachhawatjain@gmail.com 📞 7976986211 📍 Bangalore 🔗 LinkedIn 🐙 GitHub

Profile

Final year B.Tech Computer Science student specializing in data analysis, machine learning, and statistical modeling. Skilled in Python, SQL, and advanced data visualization. Passionate about deriving actionable insights from data and applying predictive analytics to solve real-world business problems.

Education

Bachelor of Technology in Computer Science, PES University 08/2022 – 08/2026
Bangalore

Technical Skills

Programming C/C++, SQL, Python	Data Science & Machine Learning Machine Learning, Data Analysis, NLP
Libraries NumPy, Pandas, Scikit-learn, PyTorch	Software engineering OOP, Data Structures & Algorithms, Design Patterns,
Data Visualization Matplotlib, Seaborn, <i>Power BI</i>	Databases MySQL, MongoDB
Tools Git/GitHub, Jupyter Notebook, VS Code Go Programming language	Software Development (Additional Skills) HTML, CSS, JavaScript, React.js, Node.js (MERN Stack)

Projects

- Credit Risk & Fraud Detection**
- Built **classification models (Random Forest, XGBoost)** on an **imbalanced dataset of 50K+ records** for fraud detection.
 - Improved **recall by ~18%** using **SMOTE, cross-validation, and hyperparameter tuning**.
 - Evaluated models using **ROC-AUC, precision-recall**, achieving **AUC > 0.90** on validation data.

- ResumeAI, React, Node.js, Express, MongoDB, TailwindCSS, Gemini API**
- Built a full-stack resume builder with real-time editing, dynamic templates, and PDF export.
 - Integrated Gemini API to generate summaries, improve job descriptions, and suggest relevant skills.
 - Developed a scalable Node.js/Express backend with MongoDB and a responsive React frontend.

- Library Management System**
- Designed a **normalized MySQL database (10+ tables)** with **stored procedures, triggers, and views**.
 - Developed a **C++ CRUD interface** for managing books, users, and transactions.
 - Optimized SQL queries to **reduce data retrieval latency by ~25%**.

- Algorithm Visualizer**
- Built a **React.js-based algorithm visualizer** for **sorting and graph algorithms** (Merge Sort, Dijkstra, A*).
 - Visualized **time complexity and step-by-step execution** using real-time **Canvas animations**.

Professional Experience

- Full stack developer intern, Nashttoo** 09/2025 – 02/2026
- Built and launched a **cross-platform food delivery application** with dedicated apps for customers, restaurant partners, and delivery partners.
 - Implemented **real-time order tracking and delivery assignment**, along with authentication and push notifications using **Firestore**.
 - Developed and integrated **REST APIs** using **Node.js and MongoDB**, and deployed services on **AWS and Vercel**.
 - Improved **delivery coordination and order flow efficiency by ~30%** through automation and real-time updates.

Research

- Graph-based Diffusion Generative Model for Brain Disorder Classification using Neuroimaging**
- Applied a graph-based diffusion model on neuroimaging data for classification of ADHD and Autism.
 - Compared performance with classical ML models (SVM, Random Forest) and Graph Neural Networks (GCN, GAT).
 - Achieved **~85% classification accuracy**, outperforming GNNs (~80%) and classical models (~75%) by 5–10%, demonstrating the model's effectiveness for medical AI applications.
 - In collaboration with Auburn University, USA.

Courses

- Introduction to Machine learning, PESU IO**
- Mastering Data Structures & Algorithms, Udemy**
- Education for Sustainable Development, IIT Kharagpur**
